

Behavioral health technology and care delivery infrastructure

One platform connecting patients, providers, care teams and organizations from referral through ongoing care.

THE PROBLEM

Behavioral health organizations lose patients between referral and ongoing care.

55% of referred patients completed a behavioral health appointment within 90 days.

BMC Primary Care, 2026 · 8,959 patients. Published research, not a LoveJoy outcome.

THE PLATFORM

One behavioral health infrastructure from access through outcomes.

01 ACCESS Referral · Provider discovery · Scheduling · Care navigation	02 CARE Video visits · Provider workflows · Clinical documentation · Care team communication	03 CONTINUITY Assessments · Osiris · The Porch · Messaging and outreach · Social-needs navigation	04 OUTCOMES Clinical outcomes · Access and engagement · Retention · Population reporting · Quality performance
--	--	---	--

OSIRIS LoveJoy's AI intelligence layer. It uses clinical, engagement and care-navigation data to support patients and care teams across the care journey.

BUILT + LIVE

Four connected products. One shared intelligence and data layer.

PATIENT Mobile app + web portal	PROVIDER Mobile app + web portal	CARE MANAGEMENT Navigator platform	ORGANIZATION Organization platform
---	--	--	--

BUSINESS MODEL

1. PLATFORM REVENUE
Paid by organizations

Annual platform contracts · Implementation · Additional programs and locations · Additional modules and services

2. CARE DELIVERY REVENUE
Paid for clinical services delivered by LoveJoy-affiliated providers

Commercial insurance · Medicaid · Medicare · Patient self-pay / cash-pay · Other contracted reimbursement

Organizations can use LoveJoy with their own clinical teams, add LoveJoy clinical capacity, or use a combination of both.

MARKET

~2,000 unique initial target organizations

\$120M
PLATFORM TAM

\$3.6M
3-5 YEAR SOM

Planning estimate after overlap. \$60K ACV is an unvalidated planning assumption; LoveJoy has not yet established this pricing through signed organizational contracts. Clinical care revenue and expansion markets are excluded from platform TAM.

\$42M
INITIAL SAM

PROGRESS

- Patient, provider, navigator and organization products live
- Osiris · The Porch · measurement-based assessments
- Provider organization established · clinical provider onboarded
- Texas Medicaid enrollment completed
- Medicare enrollment completed as part of ACCESS participation requirements
- CMS Innovation Center ACCESS Model participant. ACCESS is participation, not the go-to-market.

THE RAISE

\$750K-\$1M Pre-Seed

Product + AI · Commercial · Clinical + payer · Evidence

COMMERCIAL MILESTONE First paid organizational deployment.
