MANAGERS

ORGANIZATIONS

OSIRIS AI
INTELLIGENCE

THE PORCH
COMMUNITY

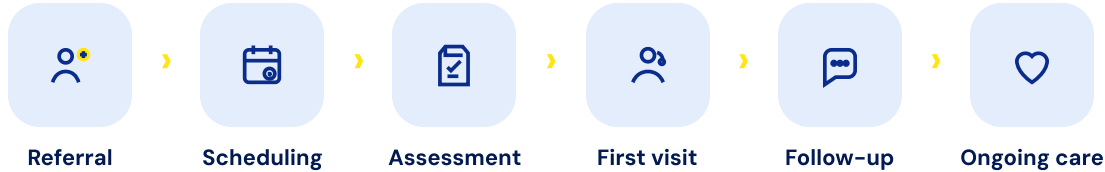

Behavioral health organizations lose patients between referral and ongoing care.

55%

of referred patients completed a behavioral health appointment within 90 days.

BMC Primary Care, 2026 · 8,959 patients.
Published research, not a LoveJoy outcome.

Patients fall out between referral and treatment.

Care teams have limited visibility between visits.

Clinical and social needs sit in disconnected systems.

Organizations struggle to measure access, continuity and outcomes.

Fragmentation affects **access, clinical outcomes, quality performance** and **revenue**.

One behavioral health infrastructure from access through **outcomes**.

OSIRIS

AI intelligence layer that uses clinical, engagement and care-navigation data to support patients and care teams across the care journey.

THE PORCH

Community and peer connection for ongoing engagement.

LoveJoy connects patients, providers, care managers and organizations across the **behavioral health care journey**.

Four connected products. One shared intelligence and data layer.

1

PATIENT

- Access and engagement
- Utilization
- Clinical outcomes
- Quality reporting

OSIRIS

AI Intelligence Layer

Osiris is LoveJoy’s AI intelligence layer. It uses clinical, engagement and care-navigation data to support patients and care teams across the care journey.

Supports quality initiatives tied to HEDIS, CMS Stars and value-based care through visibility into screening, follow-up, engagement and outcomes. No guaranteed score improvement is claimed.

CONTINUOUS ENGAGEMENT

OSIRIS

AI-supported engagement and intelligence across the care journey.

THE PORCH

Community and peer connection for ongoing engagement.

Organizations responsible for behavioral health access, engagement and outcomes.

HEALTHCARE

- FQHCs
- CCBHCs
- Community behavioral health organizations
- Provider groups
- Health systems

EDUCATION

- Universities
- Colleges
- School districts

WORKFORCE

- Employers
- Employee health programs

INITIAL GTM

FQHCs · CCBHCs · Community behavioral health organizations

Organizations deploy LoveJoy with their existing patients, providers and care teams.

EXPANSION MARKETS

Universities · school districts · employers · health systems · other organizations managing behavioral health populations

Buyers: COO, BH director, clinical director, population health, or benefits / employee health leadership.

Two complementary revenue streams

1. PLATFORM REVENUE

Paid by organizations

- Annual platform contracts
- Implementation
- Additional programs and locations
- Additional modules and services

2. CARE DELIVERY REVENUE

Paid for clinical services delivered by LoveJoy-affiliated providers

- Commercial insurance
- Medicaid
- Medicare
- Patient self-pay / cash-pay
- Other contracted reimbursement

Partner organization

Their patients + their providers

LoveJoy

Platform · Osiris · care management · outcomes

LoveJoy-affiliated providers

Additional capacity when needed

Organizations can use LoveJoy with their own clinical teams, add LoveJoy clinical capacity, or use a combination of both.

A focused initial market with significant expansion potential

1,356

HRSA-funded health centers

539

Certified CCBHCs

2,500+

Community mental health centers

These categories overlap. LoveJoy planning estimate: ~2,000 unique initial target organizations. Not an official industry count.

\$120M

PLATFORM TAM

~2,000 organizations
× \$60K assumed ACV

\$42M

INITIAL SAM

~700 qualified organizations
× \$60K assumed ACV

\$3.6M

3-5 YEAR SOM

60 organizational customers
× \$60K assumed ACV

EXPANSION MARKETS

Universities · school districts · employers · health systems. Additional upside, not included in the \$120M platform TAM.

ADDITIONAL CARE DELIVERY REVENUE

When LoveJoy-affiliated providers deliver care: commercial insurance, Medicaid, Medicare, self-pay / cash-pay, and other contracted arrangements. Separate from platform TAM.

Initial organization universe is a LoveJoy planning estimate that accounts for overlap across FQHC, CCBHC and community behavioral health categories. \$60K ACV is an unvalidated planning assumption; LoveJoy has not yet established this pricing through signed organizational contracts. Clinical care revenue and expansion markets are excluded from platform TAM.

Existing solutions address parts of the behavioral health journey. LoveJoy connects the operating model.

LoveJoy								

ONE BEHAVIORAL HEALTH INFRASTRUCTURE

PATIENT + PROVIDER + NAVIGATOR + ORGANIZATION + OSIRIS + THE PORCH + MEASUREMENT-BASED CARE + CLINICAL CAPACITY

Most solutions enter at one part of the behavioral health journey. LoveJoy is designed around the organization operating the entire journey.

Competitive landscape includes NeuroFlow, Lucet, behavioral health navigation platforms, engagement platforms, telehealth and practice-management solutions.

Focused go-to-market driving adoption, outcomes and growth.

1. BEACHHEAD

FQHCs · CCBHCs · Community behavioral health organizations

Deploy with existing patients, providers and care teams.

Expand programs, locations and service lines.

Drive outcomes, retention and quality performance.

Grow platform and care delivery revenue.

2. EXPANSION

Universities · school districts · employers · health systems · other organizations

Leverage beachhead outcomes and references.

Tailor programs to population and use case.

Channel partnerships and strategic integrations.

Scale across more organizations and markets.

3. BUYERS

COO, BH director, clinical director, population health, or benefits / employee health leadership.

Clear ROI on access, engagement, retention and outcomes.

Supports quality performance and value-based care.

Modern platform that is easy to implement and use.

Improves efficiency and reduces administrative burden.

One platform connecting patients, providers, care managers and organizations across the behavioral health care journey.
